		.zip	MATTER-001 WIN v.1.0.3.zip 14.48 MB · v1.0.3	Download		
View Product \rightarrow						
		Timeline		~		

Download the [Plugin Name] MAC.zip from your Email receipt. Click on "view product".

Tipp: The Key file "XXXX-XXXX-XXXX-XXXX" is your Serial for unlocking the plugin in your DAW.

Step 2

Go to your Downloads and copy the .component and .vst3 folder.

Step 3

Open the finder and go to /Macintosh HD/Library/Audio/Plug-Ins

Paste your .component folder into your Component folder.

Paste your .vst3 folder into your VST folder.

Have fun creating!

If you encounter any problems message us at: info@prototype.audio

How to uninstall prototype audio plugins on MAC

Since we continue to improve each plugin after the release and keep you updated with new versions, here is a guide on how to correctly uninstall the plugin and your cash to avoid errors.

Step1

Open your current Plugin version. Click "More" on top of the preset Browser. Click "Show Preset Folder". Delete everything within that Folder.

Step 2

Close your DAW.

Step 3

Go to the plugin folder where you installed them (look guide above) and delete **BOTH .component** and **.vst** version folders in VST **AND** Components.

Step 4

Open your finder and press the "go to" tab. There you press the "go to folder" option and paste this: ~/Library/Caches
